Hi all,

I'm Sam, a second-year maths & CS student and the current IT rep, and I'm running for re-election. Sorry for the fairly low-quality manifesto (I believe this still matches what is required from a manifesto according to the constitution) but I wanted to explain my reasoning for running for re-election.

IT rep isn't a particularly popular role and so hasn't received any manifestos from other members of the JCR. Rather than leave this role unfilled and the responsibility of the incoming VP I thought that it would be easier for me to continue in the role as it takes very little of my time and I already know what is required from the role so I can easily continue to fulfill these responsibilities.

I am going into my 3rd year and so it is my intention to strictly stick to the role and not volunteer for helping any other reps unless there is some reason why having my help will be considerably better than any other reps help (as in if the help needed is IT related or something along those lines). I understand if this isn't what some members of the JCR think is the best solution to filling this role and if that's the case then please feel free to RON me, I am merely offering my re-election as a potential, and I believe the simplest, solution to the current lack of an IT rep elect.

Thanks,

Sam
