

Product Management Internship

Salary: £35,000 pro-rata

Location: London, UK

Duration: Up to 10 weeks between July and September 2025

Closing Date: 31st December 2024

Role summary

FINBOURNE is offering a Product Management Internship for Summer 2025. This is an exciting opportunity for undergraduates or graduates to see first-hand how we design and build capability in our LUSID platform. Our internship is aimed at giving you exposure across our entire business. Although the role is constantly evolving, the typical product-related tasks you will be involved in will range from designing our APIs, creating a UI-based user journey, to evaluating commercial opportunities.

We will also provide training sessions to give you an overview of the Financial Services industry, Asset Management, Investments and further insight into our business and product.

How we will support you

- You will be working with highly experienced Product Managers, UI and UX designers and engineers who will provide training and mentoring for you. These individuals have spent their careers at some of the most prestigious financial technology institutions and are eager to share their experience.
- In addition to your Line Manager, you will be assigned a Buddy within your team to provide you with support and guidance throughout your internship.
- You will be invited to regular knowledge sharing sessions and discussions on best practice in coding and finance.
- Access to a network of colleagues who are happy to answer your questions and explain answers in detail.

What we are looking for

- Candidates in their penultimate or final year of study.
- Candidates who are genuinely passionate and curious to continue learning, and those who are driven to solve tough technological problems and apply critical thinking to their work. Additionally, we are looking for candidates who display strong communication skills and who feel comfortable working in an informal, agile environment.
- Ideally, you are studying a STEM subject.
- Ideally, you will also have a genuine interest in Finance and some experience with technology, either coding or design.

Throughout the internship, you will be assessed with the view to being made a permanent job offer at FINBOURNE.

Applications

- To apply, please send a copy of your CV and your answer to the following questions to hr@finbourne.com. Additionally, please confirm your right to work in the UK.
 - What are your motivations for applying for this role? (250 words)
 - What attracts you to FINBOURNE as an organisation? (250 words)
 - Please can you tell us about a time where you demonstrated teamwork and how this helped to achieve a successful outcome. (250 words)
 - Please can you tell us about a time where you have demonstrated your initiative and how this helped to achieve a successful outcome. (250 words)
 - What is your proudest achievement? (250 words)
- Shortlisted applicants will be invited to a 45-minute interview with our Product team where you will have the opportunity to talk about your interests and motivation to join FINBOURNE. As part of the interview, you will be guided through a case study and discuss your approach to a certain scenario.
- If successful, you will be invited to another 45-minute interview which will consist of a competency-based interview to continue to assess your skills against the ones required for a Product Manager intern at FINBOURNE.

Whilst FINBOURNE will not be offering accommodation as part of this internship, we are very happy to provide advice on where to find temporary accommodation in London.

Hear from our previous summer interns

About FINBOURNE

We are a young, dynamic financial technology company aiming to re-engineer the world of investing to make it clearer, faster and more cost effective for everyone.

At FINBOURNE, we offer a hugely supportive environment to build a career, with continuous learning and development opportunities. We have a collaborative culture of testing and exploring problems together to find the best evidence-based solutions. We respect your independent thought, your intellectual curiosity and your opinion.

Our solution is open, API first and developer friendly – a true first for the asset management industry. You can see what our team is busy building on Github.
